

## **REMARKS/ARGUMENTS**

### **Status of Claims**

All original claims remain in the application. Claims 21 and 22 have been added as new additional generic claims.

### **Amendments to Claims**

The addition of new claims 21 and 22 is fully supported by the specification, as described on pages 4 and 5 in the "Summary of the Invention", page 7, lines 26 to 30, page 9, lines 9 to 11, page 12, lines 10 to 15, block 69 in Figure 6 and block 80 in Figure 7.

### **Election of Species**

The Examiner has requested under 35 U.S.C 121 the Applicant to elect a single disclosed species within the claims of this application to undergo prosecution.

It is respectfully suggested that the Examiner has incorrectly identified which claims are directed towards the two individual embodiments of Figures 6 and 7. Claims 1-7, 15, 16 and 19 are directed towards the embodiment of Figure 6. Claims 8-14, 17 and 18 are directed towards the embodiment of Figure 7.

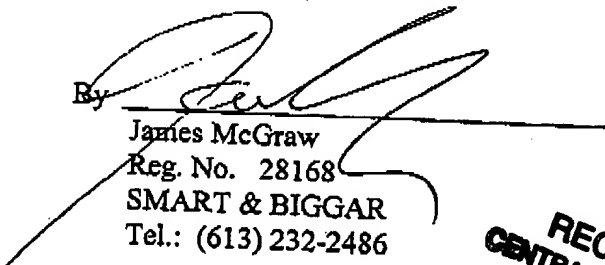

We elect claims 1-7, 15, 16 and 19 as the species we wish to undergo prosecution if none of the generic claims are held to be allowable. Original claim 20 and new claims 21 and 22 are generic claims.

Non-elected claims 8-14, 17 and 18 are currently being withdrawn with the understanding that if any of the three generic claims are found to be allowable Applicant will be given the opportunity of re-entering the non-elected claims into the application for consideration during further prosecution.

Respectfully submitted,

DOUGLAS D. MCGHAN, ET AL
